Lift Specification (In Flight Case)

Width	650mm
Height	750mm high
Depth	2010mm
Weight	145kg

Access Requirements

To ensure a safe and efficient installation, the setup location must have level, unobstructed access. JM Entertainment staff are unable to transport equipment up or down steps, stairways, or other uneven access routes.

The client is responsible for ensuring that suitable flat access is available from the unloading point to the installation area. If access restrictions are identified prior to or upon arrival, additional labour or equipment may be required, and this may incur additional charges.

Please notify JM Entertainment in advance of any access limitations, including steps, staircases, lifts, narrow doorways, ramps, or restricted loading areas.
